## II. Digital Data

Digital Data may be ordered by submitting FORM-2 – Digital Data Request and FORM-3 – Digital Data Agreement. Please allow for a minimum 5-7 working days turnaround time for the finished product(s) to be available.

The Hopkins County GIS standard publishing format for vector data is ESRI Shapefile. Hopkins County GIS can also provide data in ESRI File Geodatabase (FileGDB) or CAD (DWG).

Conversion to FileGDB or DWG formats will incur an additional processing fee of \$20.00 per order. All vector data will be delivered in Shapefile format unless specified otherwise.

Raster imagery is available in TIF format for individual tiles or compressed MrSID imagery for larger areas.

All requests for digital data must be accompanied with a signed digital data agreement. Please see FORM-3 – Digital Data Agreement document for more information.

Individual data layers can be obtained by choosing a partitioning method per the following choices. Corresponding costs are noted in the subsequent table.

- County wide – All data for the requested layer will be provided.
- Per-tile – Data is clipped to the boundary of base mapping tiles. Each tile covers 0.90 square miles (5000' x 5000'). There are 698 tiles that span Hopkins County.
